※The program is tentative at this time and is subject to change.

Program Overview

This is an international peer-learning program in which Japanese and international students explore the relationship between geo (earth) formation and food culture on Shodoshima. In addition, students will learn how this has shaped the local economy. Using the knowledge gained from this program, students can apply it to their own region, making it a more attractive place for both local residents and visitors.

Application / contact

Please apply by reading the URL below or the 2D code on the right.

<https://forms.office.com/r/8WFVTkRcSJ>

※Deadline is Sunday, December 8.

※If there are too many applications, selection will be made.
